

ENVIRONMENTAL POLICY STATEMENT

Stelrad Radiators Limited recognises the importance of looking after the environment and the link that this has on its business success. It is therefore of primary concern to the company, that the environment is protected as an integral part of its operations. To achieve this, Stelrad Radiators Limited commits to the following principles and activities:

- Stelrad Radiators Limited will not only comply with relevant environmental legislation and regulations, but will also wherever is practicably possible look to use best practice techniques and processes
- Stelrad Radiators Limited will seek to reduce and eliminate waste where possible by more efficient use of raw materials, fuel and energy
- Stelrad Radiators Limited will use wherever possible renewable energy and other forms of re-cycled raw materials, such as steel and packaging
- Stelrad Radiators Limited is committed to continual improvement in environmental performance relevant to its primary operation of producing and delivering radiators
- Company environmental performance is reviewed at local level monthly and annually to review performance and to develop business objectives
- Stelrad Radiators Limited will work closely with both suppliers and customers to help demonstrate its commitment to this policy and to promote environmental awareness
- Stelrad commits to communicate this policy to its staff and contractors and make it available to relevant stakeholders upon request

The Directors of Stelrad Radiators Limited are fully committed to the success of environmental management initiatives and will allocate appropriate resources in order to achieve objectives and targets.

Signed for on behalf of Stelrad Radiators Limited.

D.J. TAYLOR.

Operations Director
